

FTTC

FIRE TRUCK TRAINING CONFERENCE

SEPTEMBER 29 - OCTOBER 4, 2024

LANSING CENTER | 333 E. MICHIGAN AVE., LANSING, MI 48933

CONFERENCE OVERVIEW

Now in its 28th year, the Fire Truck Training Conference is the industry's leading Emergency Vehicle Technician training and testing event. Our core aim is to enhance your expertise and knowledge, empowering you to ensure that fire trucks and ambulances remain reliable and responsive, safeguarding your communities.

Embark on a four-day training journey featuring three distinctive educational tracks with over 50 unique classes that delve into the cutting-edge technology and techniques essential for maintaining and repairing emergency vehicles.

TRAINING TRACKS

Educational classes and hands-on training are broken down into three levels, making it easier to select the most relevant content.

WHY ATTEND FTTC?

- Four days of training with over 50 unique classes
- Comprehensive, hands-on education sessions delivered by industry experts
- Two opportunities for EVT testing
- Learn the latest technology and techniques for repairing fire trucks and ambulances
- Strengthen reputation and improve customer satisfaction
- Develop and grow a network of industry resources
- Connect with suppliers one-on-one during the supplier reception

EVT LEVEL I

Designed for individuals such as the Operator, Engineer or Equipment Officers that want to learn basic operation and maintenance at an introductory level.

EVT LEVEL II

Designed for the Maintenance Technicians or people at the service repair level. Some classes are hands-on.

EVT TEST OBJECTIVE REVIEW

Prepare for your EVT test with these review classes.

- F1 Inspection, Maintenance & Testing of Fire Apparatus
- F2 Design and Performance Standards of Fire Apparatus
- F3 Fire Pumps and Accessories
- F4 Fire Apparatus Electrical Systems
- F5 Aerial Fire Apparatus
- F6 Allison Automatic Transmissions
- FA4 Advanced Electrical Systems
- F7 Foam Systems
- F8 Hydraulic Systems
- E-0 Maintenance, Inspection and Testing of Ambulances
- E-1 Design & Performance Standards of Ambulances

MASTER EVT LEVEL III

Designed for the Heavy Repair Technicians who are interested in receiving hands-on, in-depth, technical training.

COMPONENT CLASSES

Supplier led and designed to focus on and troubleshoot specific apparatus components.
